

GS R5521 Wearable Bluetooth Scanner

The most compact, most rugged design with enterprise-class durability.

GS R5521 with Zebra engine SE4770 allows workers to quickly capture barcodes whether the scanner or the barcode is in motion. It has extraordinary working range, which can capture barcodes farther than 24.in/60cm away. It also can capture photos for proof of delivery and damage claims, as well as documents. It features dual-mode Bluetooth 4.0 technology and support three Bluetooth modes, which significantly increases productivity and reduces error rates. It also features NFC, vibration alerts, AI identifier recognition, real-time transmission and batch data offline upload, providing a perfect solution for warehouse, distribution center, manufacturing, etc.

Versatile wearable options-wear with Ring trigger, Ruglove or Thumbton as you like

All wearing accessories are interchangeable, Ring trigger, Thumbton and Ruglove. Allow workers to adjust the position of scanner on the hand to achieve the best comfort, better flexibility and higher productivity. Give each scanning operation a comfort and secure custom fit. With Ring trigger and Ruglove, workers can choose and decide to use left or right hand to work and swap scanning hands on the fly. With Thumbton, workers can wear scanners around the neck or on a belt to keep the scanner at hand. This is ideal for occasional scanning. Worker can share the same scanner body with their own wearable accessories without germs.

Scan engine, Zebra SE4770

- Maximum motion tolerance
- High first-pass read rates allow workers to quickly capture barcodes, whether the scanner or the barcode are in motion.
- Wider field of view
- Capture large barcodes and multiple barcodes quickly and easily with a larger 'sweet spot' — no need for users to spend time repositioning the device to capture the barcode.
- Extraordinary working range
- Capture barcodes farther than 24 in./60 cm away, allowing you to meet the needs of more types of users and applications.

Rugged internal structure owes to protecting PCBA with aluminum alloy frame

With this delicate design, the PCBA is protected from drops and bumps due to the metal protective frame, which ensures reliable operation.

Robust external structure with enhanced hardness of body and imager window

The hardness of shell and imager window has been greatly improved, which contributes to the enterprise-class ruggedness and durability.

Replaceable 600mAh battery greatly improves working efficiency

It provides a longer battery lifecycle and ensures uninterrupted full-shift operation. It is designed to support back-to-back shifts without recharging and avoid trips to the service depot to replace dead batteries. It helps to increase the productivity during receiving, inventorying, picking, sorting, packing, etc.

NFC pairing saves at least half of the connection time

Using the NFC makes the Bluetooth connection more convenient and faster. User can simply tap the scanner with any NFC-enabled devices. No need to open the Bluetooth settings to identify and select the device.
